LEDSON

Lights for Safety and Style

Tail Lights

Breeze X2 Retro tail light with multi function

- **Old-school combined with modern LED technology**
- **Tail/brake, indicator, rear fog, reverse light**
- **Approved for both vertical and horizontal mounting**

Breeze X2 Retro is a modern version of a classic original rear light. The retro-inspired design gives it a timeless character combined with the advantages of modern LED technology. The ultra-thin construction, with a depth of only 29 mm, makes the light well suited for both new and existing installations. Breeze X2 Retro is fully compatible with older rubber housings and frames from Ledson, Hella, IZE and Omnius, among others.
