600-700mm 6 bar pipe stopper – data sheet:

Product code: AP12-6.0-600700

6 bar blank inflatable pipe stopper, with an expansion range of 600-700mm/24-28, suitable for pipes with a maximum back pressure of 3.0 bar (30m head of water). This blank inflatable pipe stopper requires 6 bar inflation pressure, and is suitable for pipes with a diameter larger than 585mm.

Blank inflatable pipe stoppers can be used to seal a wide range of pipes, with remote inflation through an inflation hose. These pipe stoppers are manufactured from natural rubber, and are fitted with a series 26 coupling.

This stopper can be purchased on its own, with a hose only or with a hose and compressor controller.

Please note: Suitable bracing should be used with inflatable blank pipe stoppers at all times. Back pressure values given are valid in concrete pipes and properly braced configurations

Inflation Range	**600-700mm / 24-28 Inches**
Minimum Pipe Diameter	585mm
Length	3000mm
Inflation Pressure	6.0 bar
Max Back Pressure	3.0 bar
Weight	25.5kg

- Made of high-quality rubber (natural rubber) with fabric reinforcement
- Temperature range from -20 to +80°C

Inflation options:

Hose and compressor controller:
