

Product Name: Drywall Access Panel, Tape In – Ceiling & Wall
Product Code: BYDAPTA58, BYDAPTA12

General Schematic

Dimensions in mm

Definitions

- Neck size:** Cited in listing title. Size of the opening that would be cut into the wall/ceiling to install the access panel. Depicted via N1, N2 in schematic
- Opening size:** Size of opening available for access once panel is installed. Depicted via W1, L1
- Overall size:** Total size of access panel (set bead flange not visible once installed). Depicted via W2, L2

Other specifications:

- 1.5mm galvanized steel welded frame with 0.9mm galvanized steel lid
- Set beaded frame, with cut corners for added durability. For tape in / mud in applications
- White powder coating finish
- Moisture resistant gypsum board. Available in two thicknesses
 - BYDAPTA58: 15mm (~5/8")
 - BYDAPTA12: 12.5mm (~1/2")
- Mini push open latch
- Safety wire and hook
- Pin hinge door fully removable
- High durability and corrosion protection
- Made in China

Installation Guidance

1. Measure neck size of access panel
2. Cut hole on wall +5mm larger than neck size
3. Remove the door from the panel frame
4. Fit the frame to the hole, and secure in place temporarily (eg using a clamp)
5. Fix frame to the drywall easily by drilling drywall screws through the frame directly into the drywall. Recommended to install minimum 1 screw per side. Screws not included
6. Replace the door on the frame
7. For applications where panel is to match the surrounding wall, finish the door as with normal drywall finishing, ie mudding, sanding and painting
