

Anti-Flood Air Brick

- Anti-flood valve, which seals with rising flood water
- Straight replacement for standard clay or plastic air bricks
- Removable grille, allowing easy access for maintenance and inspection purposes
- Maintains essential air flow complying with BS 493:1995
- Integrated mesh unit stops insects and debris entering
- Can be fitted to single, double and triple air brick apertures.
- Kitemark Certified to BS 851188-1

The Fernco Anti-Flood Air Brick is a straight replacement for a standard clay or plastic air brick. This innovative product seamlessly integrates into properties, providing a robust barrier against floodwater while maintaining essential airflow.

Inside the Fernco Anti-Flood Air Brick is an innovative self-seal floating valve which automatically seals the vent during a flood event. The valves are lifted by rising water, creating a watertight seal.

The valve will re-open once the water has receded, allowing ventilation to the sub-floor of the building once again.

The Anti-Flood Air Brick is a passive flood protection product, which means no manual intervention is required to prevent the property from flooding.

Product Code	AFAB-TER
Description	Fernco Anti-Flood Air Brick
Size (mm)	W = 210 H = 62 D = 73.5
Material	Polypropylene
Colours	Terracotta
Standards	BS 493:1995 BS 851188-1
