

Lime Green Pure Lime Grout

V1

General

Lime Green Pure Lime Grout is designed for pouring or pumping into voids in order to stabilise historic masonry. It is completely free from cement and resins, and is suitable for listed buildings and scheduled monuments, or most solid brick or stone walls. It is breathable, elastic and salt resistant.

Packaging

Available in 25 kg bags. Shelf life 6 months from date of manufacture. Store in a dry area free from damp. Do not stack directly on the ground.

Yield

25kg yields approx 16 to 17 litres wet mixed grout. Approx 62 bags per m³ of grout.

Preparation

Re-point masonry using a suitable mortar, (see *Lime Green Natural Lime Mortar*), leaving weep holes at regular heights. Pre wet the masonry by flushing with water, to aid the flow of the grout.

Mixing

Add approx 6 or 7 litres of clean water to a 25kg bag of grout and mix with drum mixer or drill and paddle. Mix until a thin easily pourable consistency is achieved. Do not allow to stand, use immediately.

Specialist low pressure mixing pumps may also be used – please consult the manufacturer.

Application

Carefully pour or pump the grout in to the wall. Plug the weep holes with clay as the grout appears, to be re-pointed later once the *Pure Lime Grout* has set.

Full Declaration of Ingredients

20%+	NHL5 Silica and Limestone
1 to 20%	n/a
1% or less	Clay Flow agent (man made)
Others	None
