This is no problem; The prediction is given a slow shake, and the WORDS VISIBLY change to the 4 of HEARTS. SPLIT PREDICTION by Massimo Cascione & Anthony Stan

An incredible visual effect that ends with an impossible object! With Split Prediction, you will be able to perform a multi-phase routine that your audience will not forget because in the end the magic happens in their hands. The effect can be presented in several ways, here is one of them: The magician explains that he has made a prediction that is in the card case. Then 2 cards are chosen by one or two spectators. The magician presents his prediction and asks if it matches one of the chosen cards but no card matches. At this point the trick seems to have failed, but the magician points out that if you mix the two chosen cards by taking the value of one card and the suit of the other card, it may match the prediction. As the explanation is not too convincing, the magician asks to look carefully at the prediction which he will magically separate into two halves of cards making the two chosen cards appear! But it's not over, the two halves of the cards are put in the spectator's hand and after a magic gesture the pieces will be reconstituted to form an impossible card that can be immediately examined.

You can also perform a routine with three selected cards where your prediction will be good and allow you to reveal each of the selected cards. No elastic thread. Ready to perform. Reset in seconds. Instructional video (English and French). Gimmick and special cards in Bicycle Rider back Blue (USPCC)...£28.00...**Merlins Special Price...£20.00**

ENDLESS CUP by Maibro & TCC

An exciting new take on a legendary piece of magic for modern performers. The Lota Bowl is one of the oldest magic tricks in the world. It was often used in special ceremonial rituals as far back as 3000 BC. While the effect remains phenomenal, the props have become largely outdated in recent years. So, TCC set out to bring The Lota Bowl into the modern age with a natural and organic prop. While it looks like an ordinary coffee cup, "The Endless Cup" by TCC can conceal almost half a cup of liquid without leaking.

You can cleanly display both the inside and bottom of the cup, while still having the ability to easily make the liquid flow into your cup whenever you need. "The Endless Cup" is the perfect tool for routines like: The classic self-filling cup routine, Water vanishes and appearances, Appearance of a selected beverage, Transforming water into juice or wine, Even some paper balls routines like those of René Lavand. The unique internal structure of "The Endless Cup" makes it difficult to mass-produce. So, TCC photo-cured 3D printing to create a single piece. Each one is then hand-painted and finished to ensure that the final product looks like an ordinary cup, even up close. The secret components are cleverly hidden from the audience's sight, which is the key component in allowing you to cleanly display the cup as if it's totally normal...£85.00...**Merlins Special Price...£69.00**

ANAKARAKURI by Tenyo

The magician removes a small packet of cards from the deck and shuffles them. He deals them into two piles, asking a spectator to stop him at any time. The cards on top of the two piles become two selections, one for each spectator. One is the Eight of Hearts, the other the Queen of Hearts, but the magician does not know this. Each spectator looks at and remembers their selection. The performer brings out a piece of paper that is coloured with red and white squares, and has holes in the shape of hearts all over it. After displaying both sides of the paper, he explains that it will divine which two cards they are thinking of. He folds it and displays two hearts, asking, "Is that your card?" to the first spectator? "No," he says. The performer refolds the paper to display four hearts and again shows this to the spectator, saying "That is your card, the Four of Hearts?" "No," says the spectator. "Please give me one last try. What was the name of your card?" The spectator responds, "The Eight of Hearts." The performer snaps open the paper to reveal an Eight of Hearts. Just as quickly he pulls the paper fully open and the Eight of Hearts vanishes. The he turns to the second spectator and asks her to name her card; she says "Queen of Hearts." He folds the paper and in a snap the Queen of Hearts magically appears upon it. And with another snap the paper is pulled open and shown on both sides-the Queen of Hearts has vanished, and the paper is exactly as it was at the start...£18.00

4K COLOUR VISION by Brent Braun

Brent Braun has transformed a classic you may have not performed in years into a hard-hitting effect you'll never want to leave home with out. "4K Colour Vision", Brent Braun provides an incredible update to the famous colour vision magic trick. You know, the one with a toy die with different colours on it and a plastic carrying box. This trick is so famous, even most laypeople know the secret. And this plays into your favour. Because, while "4K Colour Vision" floors everyone, it's especially mind-boggling to those who are familiar with the original colour vision magic trick. This is a bonafide magician fooler. "4K Colour Vision" is a multi-phase, jaw-dropping feat of mind reading that can be carried in your pocket. The die is placed inside the opaque box with one colour facing up. You're able to guess which colour it is every time. Each phase is more impossible than the last. You can even name the colour when the spectator has placed the die into the box behind their back. Nobody in the room knows the colour. Yet, you can still guess it correctly without even needing to touch the box. These final phases are absolutely devastating and are what set "4K Colour Vision" apart from any other colour vision. No mirrors. No magnets. No electronics. No remotes. No bluetooth. No WiFi. No special magic apps. No stooges. No pre-show. "4K Colour Vision" is the real deal. It's a true pocket-sized miracle that will slide directly into your working set. Each set comes with all the custom-made props you need to get started right away and access to complete teaching and a full routine from Brent Braun...£19.95

THE CELTIC MARBLE MYSTERY by Retro Rocketeers

The Celtic Marble Mystery is a beautiful effect where a spectators freely chosen coloured marble seems to impossibly disappear from it's position and reappear inside a central container, underneath a shot glass! The piece has historical roots dating it's origins back to the 1930's and Jack Hughes Penetra Spheres and the more popular Abbotts Hole in One. However the Celtic Marble Mystery has a few key differences that also allows you to perform it in different ways. The spectator has a 100% free choice marble. The marbles do not need to be handled after the spectator makes their selection. The effect can be instantly repeated without handling any of the marbles. The spectator can simply choose another coloured marble and then have that marble again instantly appear under the shot glass. The bottom of the base can be flashed to your audience. Designed with an Irish Celtic flare influenced by our Irish roots this piece is also made from Australian Jarrah Eucalyptus hard wood giving it a deep luxurious feel and a connection with our new home in Australia...£179.00

ULTRA COLLECTORS by Don England

The four tens are removed from the deck and tabled face-up. Three cards are then selected, memorised and lost in the pack. The tens are placed on top of the deck. The magician snaps his fingers and then spreads the tens. Three face-down cards are now interlaced between them! When the cards are removed and turned over, they are the three selections!

EXPRESS CUBE by Tora Magic

The magician shows a regular puzzle (Rubik) cube to the audience. The cube is mixed by a spectator and the cube can even be used in a previous effect. After the cube is mixed it is placed in to a box with large circular cut-outs on each side, allowing a clear view of the cube. The cube is a snug fit inside the box and cannot move or twist. The box is securely sealed with a lid locking the cube inside. Attached to the top of the box lid is a chin and ring. Next a square tube is introduced and shown empty. The box containing the mixed cube is inserted into one end of the tube, again, this is a snug fit with no movement for manipulation. The chain and ring remain on full view on the outside of the tube by passing through a narrow channel cut through one side of the tube. The chain is pulled through the tube pulling the boxed cube from one end of the tube and out of the other. The tube is shown to be completely empty once more. Incredibly, under these totally impossible conditions, the puzzle cube has magically become totally solved! Even though it is still securely sealed inside the box. The box is opened and the cube is removed and shown to be solved on every side! An absolute miracle with a method so good that you almost want to show the audience!...£165.00

TWO STAND ALONE by Liam Fox

A spectator is asked to cut a deck in to two equal piles. Both the spectator and performer each take one of the piles and spreads it face down in front of them. Then, to make it as fair and as random as possible the spectator is asked to slide out a card from the performers pile (keeping it face down) and the performer does the same to the spectators pile. The performer and spectator each sign their respective cards. Both selected signed cards are cut into each pile losing the card somewhere in the centre. The performer and spectator each spreads their cards face down in front of them as before. The spectator is asked to slide out any card they wish from the performers spread pile and the performer slides a card from the spectators face down spread. Both cards are cut into each pile as before. Then, the performer spreads his cards face up showing amazingly that he chose the spectators signed card! All the other cards in his pile are blank! The spectator is asked to spread their pile face up this time and amazingly the one card that they chose from the performers pile just a second ago is actually his signed card. But not only that, all the other cards are blank too!! All cards can be examined!!...£25.00

FLASH DICE by Tora Magic

The magician enters with a smart, acrylic black and silver tube. The tube is folded completely flat, nothing could be concealed inside. The tube is popped open and with no suspicious moved a large colourful die is produced from inside. The tube is squashed flat again, shown around and then popped open onto the magicians empty palm.

When the tube is raised a second colourful die has made an appearance! The tube is shown right through, it is unmistakably empty, the tube is turned vertical and a third die instantly appears from within! Again the tube is shown empty only for a fourth die to appear! This time the magician passes his arm right through the tube emphasising that nothing is inside. The audience are astonished to see a fifth die instantly appears from the tube quickly followed by a sixth. This production is insane and completely baffling. The SIX differently coloured dice together make such an impressive production, far greater than that which the tube could conceivably contain!...£75.00

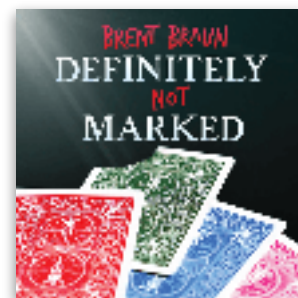

PEEK PACK by Brian Gillis

This multiple-selection mental miracle is perfect for close-up or stand-up to manipulate the minds of the audience without manipulating the cards! Brian has used this reputation-maker on Johnny Depp, Harrison Ford, Paul McCartney, Muhammed Ali, Charlize Theron, Eddie Murphy, Arnold Schwarzenegger . . . and some of the bigger names. Even though it's easy to do, Brian has also fooled magicians with The Peek Pack over the last 20 years in all three rooms of the Magic Castle! "FIND OUT WHY THE PEEK PACK WENT DIRECTLY INTO MY CLOSE-UP AND STAND-UP SHOWS. Picture this: Each and every card is peeked at - as the pack is riffled. Six spectators. Six selections. Six revelations. During the show, I use a poker tell ruse of reading body language and facial expressions. After the show, this is the one that people tell me is completely believable. Trust me when I say The Peek Pack is so strong that you'll want to toss out your Tossed Out decks and use this as often as possible!" - Gregory Wilson...£45.00

DEFINITELY NOT MARKED Brent Braun

Brent Braun's ridiculous expose of real-time card marking is surprising, funny, fooling, and has been in his back pocket for more than a decade, so you know it's good. This packet trick that comes with all the gimmicks you need show your audiences "the real work" of how cheaters always prosper. In this well-structured routine the performer removes the four aces from a red deck while describing a special type of marking system where you could rub lipstick on the back of the cards to secretly tell what they are. In showing the cards, one of them magically turns pink. Next the performer describes how you can also use the ink in your blue jeans to mark the cards, and now the back of one of the cards has transformed into a blue card. Now a tactile system of marking called nail nicking is demonstrated and the third card has not only turned green but is missing a huge corner. For the finale, the magician proves the last card is definitely not marked by showing it has transformed from a red bicycle backed card to one with boldly printed letters that say, "Definitely Not Marked." The best part is that at the end you can let your audience examine the cards. In addition to the routine Brent teaches you how to start the trick from a deck of playing cards, and end clean so everything is examinable. The squeaky clean ending is so deceptive, he's been fooling magicians at conventions with it for years. You'll definitely get big reactions with Definitely Not Marked...£19.99

RED LORRY YELLOW LOLLY by Tony Gardner

The magician fans out four cards, the faces of each card is shown, each card is printed with the image of a bright RED lorry. The cards are given a shake and are shown again. The cards all now have bright YELLOW lorries on them! Two cards are given to the spectator to hold. The magician shows his cards, one has a RED lorry, the other has a YELLOW lorry. He asks the spectator to try to recite the well known tongue twister, RED LORRY, YELLOW LORRY etc. It sound like they are saying lolly instead of lorry. DICE PYRAMID by Tora Magic

This is a fantastic effect with a super surprise ending. Suitable for all audiences, children to adults. The magician shows four dice of different sizes, a tube and two lids. The four dice – black with white spots – are stacked, largest to smallest, to form a pyramid. This dice pyramid is covered with the tube, and the tube is then closed. The tube is now turned over. This means that the smallest dice should now be at the bottom. When the tube is removed, the dice pyramid is still the right way up, the largest dice at the bottom, the smallest on top! This is repeated (however many times you wish) with the same perplexing result. The pyramid is again covered with the tube and turned over as before. The tube is removed – and the dice stand on the table in the correct order. But that is not all: each dice has changed into a totally different colour! Fantastic props, beautifully designed, totally mechanical...£165.00

STOP RIGHT THERE by Al Smith

A super clean, direct 'Open Prediction' that is very powerful and easy to do. A spectator cuts a deck of cards, and from the cut off point (no, its not a cross-cut force, its genuine) he deals face up and stops ANYTIME. He stops on, let's say, an eight. The card before that might be a five, and the card after might be a three. He deals eight cards, matching the number of spots on the card stopped at. Five or three would have led him elsewhere, but the eighth card matches the performers prediction card exactly. No switches, no sleights, prediction is with the spectator before the trick starts...£20.00

DELUXE HOPPING COIN SET (Expanded Shells)

A classic coin effect made better than ever. A 10 pence and a 2 pence coin in your hand. You place the 10p in your pocket, but when you open your hand, both coins are still there. You repeat the effect with the 2p, and the same happens. You now put the 10p in your pocket, but amazingly, when you open your hand, the two coins are still there. You now take the 2p, and again place this in your pocket, and get the spectator to blow on your closed hand. When you now open it, the 10p has VANISHED. A super clean self working coin miracle, that looks like real magic, but is so simple to perform. This one is a superb set as it is crafted using British currency by Tango and is supplied with expanded 10p and 2p shells making it great value and very versatile...£50.00

FLUKE by Wayne Dobson

A red deck and a blue deck is shown, and one chosen by a spectator, say the red deck. The spectator now calls out a number from 1 to 52, say 18. You open the blue deck and find there is one card reversed in the deck, which is placed unseen on the top of the deck. The spectator now opens his red deck, and deals down to the 18th card. He turns it over, and it is the 6 of clubs. You now show that the reversed card in your deck is also the six of clubs. A great effect, and very easy to perform. Spectator can freely choose any number from 1 to 52 and the card is always different. Use any red and blue Bicycle decks (Decks not supplied)...15.00

In effect, the Magician displays a beautiful 13 cm tall square walnut tube which sits on an elevated platform along with an empty glass bottle. The empty bottle is placed onto the platform and the

bottle is then covered with the tube. This is left in full view of the audience. A silk is now shown. The magician places the silk into his hand whereupon the silk vanishes completely! Then, the faces magically reappear, but the backs have now all changed to red! So much is happening inexplicably to these four cards you explain that the spectators may think you are using camera trickery! So, you explain that "no camera tricks are used" and to prove this, you produce from the four cards a sign illustrating the fact! Finally, you say that you will let the spectators in on the secret as you reveal that it is all done with mirrors, and show that all of the cards are now printed with mirrors on them!! ULTIMATE TRIANGLE MYSTERY by Retro Rocketeers

Designed in an ancient Viking theme this ornate and stunning table top appearance feels like an illusion you'd see enlarged and on stage. The performer introduces a wooden stand along with 3 decorated wooden panels. The stand is set up and the 3 panels placed onto it. A triangular base is then introduced and one by one the plates are taken and slotted into the stand slowly constructing a prism shaped container. Once all the plates are in place the base is spun around so the spectator can see the container entirely. But then the performer reaches into the container and a large solid ornately designed monolith is pulled out from within the container. The container is then also opened up to reveal nothing hidden inside and the monolith can then be handed out to show it is indeed a solid mass. This piece has roots spanning back to the early 1900's and the mystical Okito himself. Now re-imaged the Ultimate Triangle Mystery add new features bringing new and improved subtleties to this piece making the effect more deceptive than ever...£199.00

STRANGERS GALLERY by John Bannon

John Bannon's incredible colour-changing deck routine has become a modern-day classic, and once you've seen the impact this effect has on an audience, combined with the minimal amount of sleights necessary you'll know why. From a blue-backed deck, the performer removes three face-down cards from three different places. A fourth card is selected. Each of the three initial cards are shown to match the selected card exactly. The performer remarks that the only way the trick would be possible is if the four cards came from four different decks. Accordingly, the backs of three cards change from blue to black, yellow and white, leaving four cards with four different coloured backs! For the climax, it is revealed that none of the four cards could have come from your deck...because it is spread and seen to be RED! Includes 10-page booklet and all the necessary gaffs specially printed by the U.S. Playing Card Company...£12.00

SHARPIE THROUGH £1

The cigarette through coin became a classic effect and created an absolutely stunning illusion. Cigarettes are not as in vogue right now and this incredible visual effect has fallen from popularity. This new version allows you to present this amazing effect once again with the cigarette being replaced with a Sharpie. As always Tango Magic has precision engineered this coin to the highest standards and includes a tutorial video to show you the new handling...£40.00

JOKERS DIARY by Steve Cook

You display a pocket diary and a deck of cards. You ask a spectator to think of and name ANY date, of some personal significance to them (birthday, anniversary etc.) You remove the deck from its case and run through to find the joker while you explain that everyone will have significant, favourite date. However, it is not so well known that everyone also has a significant, favourite playing card. Here you openly reverse the joker and stick it face down, randomly into the face up deck. The joker is left protruding from the deck and remains in view. The spectator is handed the diary to examine, they will find that there is a random playing card written alongside every date in the diary. The spectator finds their selected date but keeps the card a secret for now. You ask the spectator to confirm that the playing card would have been totally different if they had selected the date before or after the one they selected. When they confirm this you ask them to name the card written by their freely selected date. When they do you draw their attention back to the isolated joker. The joker is cleanly removed and slowly turned over....it is now the very card found by the spectators selected date!! This effect does not require any difficult sleight of hand. No forcing, no counting, genuine free selection of date, different card every time, only one diary is used...£22.00

UNITY ILLUSION by Tony Davies

A small batch just made, and available right now.

This is a fantastic effect and is very easy to perform. You show a tray, front and back, and place this down on the table. Now, you place two Chinese style tea chests on the tray. The chests have holes running through the sides, and through the holes there is a threaded a white ribbon. The ribbon can be initialed by a spectator at each end. The boxes are now parted, and the ribbon can be clearly seen to run from one chest to the other. The ribbon is now CLEARLY cut, and can now be seen to be in two halves. You attract the spectators attention to the Chinese symbols on the box, which translate into English as 'Unity' The boxes are placed next to each other, and the ribbon pulled from one end. Amazingly the whole ribbon starts to move, and can be pulled through the chests to show it is in one piece. The ribbon can now be examined to show that the initials are there, and it is in one piece. This can be given away as a souvenir or re-used again. The method is ingenious, and we are sure it will appreciate the quality and simplicity of this effect! This is one of Merlins Premier Range of Limited Edition Collectibles...£245.00

You now show that all three cards are blank, the darts really have been thrown. Imagine the spectators surprise when they turn over the face down dartboard card and discover the darts are now stuck in the bullseye of the Dartboard! Very easy to do and instantly re-set making this novel effect perfect for strolling and table hopping...£15.00

DIABOLICAL DIE BOX

The magician exhibits a beautifully turned round hardwood box and three regular dice. The spectator is allowed to roll the dice several times to satisfy the audience that the dice are indeed regular dice. Holding the open box behind his back the magician turns away from the spectators. The magician will not see the dice again until the very end of the routine. The spectator shakes the dice and drops them into the box, totals the numbers on the dice and writes it down. Keeping the box behind his back the magician replaces the lid and shakes the box causing the dice to rattle around inside. Keeping the box behind his back the magician lifts the lid to allow the spectator to see the dice, again the spectator totals the numbers on the dice and writes it down. Once more the lid is replaced and the box shaken. The lid is removed and the dice are cast upon the table, the spectator records the total number on the dice and then adds up all three recorded numbers to arrive at a grand total. The magician is instantly able to call the number that the spectator is thinking of. The effect can be instantly repeated. The Diabolical Die Box is our tribute to the Eli's Die Box made by Thayer's in the early 1920s. There has been many versions over the years made from different materials and in different shapes, styles and sizes. We wanted ours to honour the original Thayer model and the woodturners art...£70.00

MIND TRIP by Mark Lee

Mind Trip is a direct double prediction with interesting props and a great theme. Very commercial and totally self-working! The magician states that he has just returned from a city vacation. He introduces a small metal suit case (about the size of a deck of cards) and a deck of playing cards. He removes the cards from their box and freely shows the faces to be all different and thoroughly mixed. The deck is turned face down as the magician explains that he has written a famous city on the back of each card giving a choice of one of the fifty two most popular cities in the world to visit. A spectator selects a face up card which is placed on view while the magician shows some of the other cards and cities that the spectator could have selected. The spectator turns their selected card over to see for the first time which city they chose, Las Vegas. The magician picks up the small suit case and turns it over to reveal a Las Vegas travel label attached to its side! Not only that, the magician explains that whilst in Vegas he picked up a souvenir from one of the casinos. He opens the small case and shows that it contains a single playing card from one of the famous casinos in Vegas, but not just any card, when the card is turned over it is discovered to be identical to the one selected by the spectator!!...£30.00

FUN CUBE by Tora Magic

This is a real winner! Super quality props and a great routine. The magician shows a large, stout, brown paper bag from which he takes out a giant red die. After showing the bag empty (even folding it flat, before opening it back up and placing in full view) he places the die on an elevated base. He then in-prisons the die with

frame like cage, the die being visible through the large circular cut-outs in it's sides. And then, further traps the die with a solid sided wooden cover. The magician then claims that he will magically make the trapped die vanish from under the cover and reappear inside the bag. After making a few mystic gestures he lifts the cover, but the die is still where it was placed. This 'business' can be repeated to suit your audiences. Finally, the magician succeeds and the die does vanish from under the cover leaving the frame totally empty! And to be found back inside the bag where it started! Very visual and easy to perform. ANIMAL SVENGALI

Here's a coincidence effect that's great for kids because it's filled with things kids love: Animals, colours and a puzzle. You'll love it too, because it's a no-sleight trick with a big surprise reveal. Check out the video and you'll see how it all comes together. You show the faces and backs of a packet of oversized cards and state, "Think of a number between one and ten, and I'll deal exactly that number of cards on the table, face up." Any number is named (no force) and the dealing begins. You stop when that number of cards is dealt. You show the selection. In the video, you'll see MOUSE. The cards are turned over, and the kids discover that it's a picture puzzle begging to be solved. But it's easy, taking only seconds, as everyone pushes the cards together to form an image of an animal. And guess what? The design magically matches the name of the animal they selected earlier! Coincidence or is it magic? That's the fun of Animal Tarot. It's by the Other Brothers, so you know it's clever, practical and easy to do. You'll enjoy performing it, and your family audience will delight in the process as their colourful, mosaic animal puzzle takes shape right before their very eyes...£22.00
