

200-400mm 1.5 bar pipe stopper – data sheet:

Product code: AP12-1.5-200400

1.5 bar blank inflatable pipe stopper, with an expansion range of 200-400mm/8-16, suitable for pipes with a maximum back pressure of 0.5 bar (5m head of water). This blank inflatable pipe stopper requires 1.5 bar inflation pressure, and is suitable for pipes with a diameter larger than 185mm.

Blank inflatable pipe stoppers can be used to seal a wide range of pipes, with remote inflation through an inflation hose. These pipe stoppers are manufactured from natural rubber, and are fitted with a series 26 coupling.

This stopper can be purchased on its own, with a hose only or with a hose and compressor controller, hose and hand pump controller or hose hand pump controller and hand pump.

Please note: Suitable bracing should be used with inflatable blank pipe stoppers at all times. Back pressure values given are valid in concrete pipes and properly braced configurations

Inflation Range **200-400mm / 8-16 Inches**

Minimum Pipe Diameter 185mm

Length 650mm

Inflation Pressure 1.5 bar

Max Back Pressure 0.5 bar

Weight 3.4kg

- Made of high-quality rubber (natural rubber) with fabric reinforcement
- Temperature range from -20 to +80°C

Inflation options:

Hose and compressor controller:

Hose, hand pump and hand pump controller:
