

Tips for Sending Toilet seat Photos

Step 1 — Take Photographs of the Top, Front & Side

Stand back and capture the whole toilet from the top, front, and side. These angles show the shape of the pan and seat outline.

Top view (This helps us see which shape your toilet seat is)

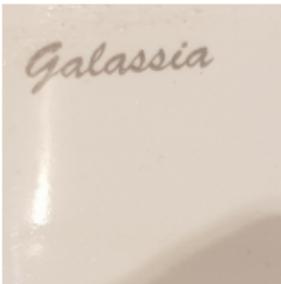

Side view (Showing the side of the toilet helps us identify the toilet seeing all the shapes)

Complete view (This image here is the best angle)

Step 2: Any photographs of the logo on the Toilet Pan

Step 3: Measurements (Please provide these measurements from the toilet pan)

- X = Width at the widest point where the seat sits
- Y = Length from the centre between hinge holes to the front of the toilet
- Z = Distance centre-to-centre between the two hinge holes

Where to Send Your Photos
