

How to send shower valve photo's

Step 1: Identify the Brand

Look for a brand name, logo, or markings on the valve — often on the faceplate, handle, or trim. If you can't find one, clear photos will help us identify it.

Step 2: Take Clear Photographs

Capture three clear images:

- (1) a close-up of the front,
 - (2) a full view of the valve and surroundings, and
 - (3) any visible labels, codes, or engravings.
- Use good lighting and ensure your camera is in focus.

Step 3: Include Additional Information

Add any extra details such as the installation manual, product code, or installation date. The more info you provide, the faster we can assist.

Step 4: Send Your Photos

Email your images and details to our support team

Sales@bathroomspareparts.co.uk

Clear photos speed up identification and help us recommend the right replacement parts.
