

Hydra30 Gen2 angled work light 30W (Black Edition)

- ✓ Hydra30 Gen2 with a really wide beam pattern
- ✓ "Black Edition" is upgraded with a dark look
- ✓ Plenty of light in a compact design

Ledson Hydra30 Gen2 "Black Edition" has been updated with a darker, modern design that blends discreetly into the vehicle's appearance without affecting performance. The work light has a three-stage angled design that provides a very wide and even 120-degree beam pattern. The light distribution is significant even close to the vehicle, unlike traditional floodlights where the width is only achieved further out in the beam pattern, providing more usable light where it is most needed.

SKU	33490313
1 LUX AT X METERS	54 m
