

EPIX31 Slim Curved LED Bar 31" 162W

- **Ultra-compact design with impressive lighting**
- **Curved shape that fits a curved front**
- **572m range at 1 lux with powerboost**

Epix31 Slim Curved is a slightly curved LED bar in a compact design that combines good range with effective lateral light distribution. The model is 784 mm wide and is specially designed for modern vehicles with a slightly curved front, where the shape of the LED bar harmoniously follows the lines of the vehicle. The curved design also provides a slightly wider beam pattern towards the road edges compared to a traditional straight light bar. The compact size makes the model suitable where high performance is required while preserving the appearance of the vehicle.
