

EPIX9+ Wide Driving Beam auxiliary light 9" (Ivory white, Powerboost)

- ✓ Epix9+ Wide Driving Beam with a wider light pattern!
- ✓ Ledson developed Swedish design in ivory white
- ✓ Sleek dynamic activation enhances your presence

The Epix9+ Wide driving beam in ivory white has a 40° wide beam pattern, compared to 20° for the driving beam, providing significantly greater coverage and safe visibility even in demanding environments. The wide beam pattern makes it easier to spot animals and other unexpected obstacles in good time, while the range of 677 metres in power boost mode and 359 metres in E-approved mode provides a well-balanced combination of width and length in the beam pattern.
