

EPIX9+ Strobe Wide Driving Beam auxiliary light 9" (Powerboost)

- ✓ Epix9+ with Wide Driving Beam for a wider light pattern!
- ✓ Strobe light with five different patterns (one R65-approved)
- ✓ Ledson developed Swedish design with a unique appearance

The Epix9+ Strobe with Wide driving beam has a 40° wide beam pattern (compared to 20° for the driving beam), covering a larger area and providing optimal visibility even in very demanding environments. The wide beam pattern makes it easier to spot animals and other unexpected obstacles in good time, contributing to increased safety for both drivers and other road users. Despite the wide beam pattern, the Epix9+ offers a range of 663 metres in powerboost mode and 359 metres in E-approved mode, providing a well-balanced combination of width and length in the beam pattern.
