SILICATE MASONRY SYSTEM

Ecopro Silicate Masonry Paint is a highly durable mineral paint that dries to a classic, matt finish. Highly breathable yet water repellent, it offers a durable, user friendly alternative to traditional lime based and conventional coatings.

Ideal for interior and exterior mineral surfaces such as stone, masonry, concrete, pebble dash, plaster and sound silicate-based paint surfaces. Especially suitable for use on lime render.

- High performance alternative to lime wash
- Water repellent, weather resistant, does not yellow
- Breathable
- Helps prevent algae growth
- Durable
- Easy to apply with standard brush, roller or suitable spray gun

ECOPRO

SILICATE MASONRY SYSTEM

Earthborn Ecopro Silicate Masonry System is suitable for use on any porous mineral substrate, chemically bonding to form a durable, water and weather resistant barrier, whilst allowing the wall to breathe.

Preparation - ensure that all surfaces are clean, dry, sound and algae free.

Step 1 Apply a coat of Ecopro Silicate Primer

Step 2 Apply a coat of Ecopro Silicate Masonry Paint, diluted with 10-20% Ecopro Silicate Primer

Step 3 Apply a final coat of Ecopro Silicate Masonry Paint.

Note: Earthborn Ecopro Silicate Masonry Paint should not be applied over conventional 'plastic' masonry paints. Some clay surfaces may require special treatment.
