Roth underfloor heating

Overview with underfloor benefits...

Complete Roth underfloor heating solutions

The future of UK heating and cooling systems is underfloor combined with low temperature air and ground source units. Roth has developed and manufactured reliable and innovative under floor heating and cooling systems for more than 30 years. Today we already offer complete solutions for all types of projects from minor refurbishments to major new builds. When you choose a complete Roth underfloor heating system, you purchase high quality and technical excellence. You will receive best in class service from bespoke design to delivery. We provide solutions for all types of construction and flooring designs, from conventional screed to dry systems covering joisted floors, low construction height, rapid response times and low energy consumption.

The result for consultants, developers, installers and end-users are Roth systems that are easy and flexible to work with and give the consumer plenty of comfort and guaranteed energy-efficient heating. Today the Roth systems are not just installed in domestic housing the benefits of underfloor are being experienced in many sectors such as healthcare, schools, retail, sports and leisure's, exhibitions halls, conference centres, offices, poultry farms and warehousing.

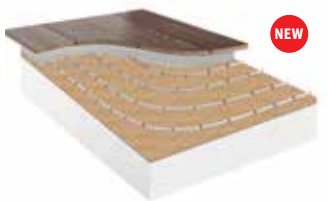

ROTH SCREED SYSTEMS

SYSTEM DESCRIPTION

Roth Original Tacker® System

The Roth Original Tacker® System provides a high degree of flexibility and ease of installation even with most challenging of floor plans. The pipe is secured to the pre-laid insulation by means of a Roth tacker gun and barbed 43 or 58 mm pipe clips. The system is suitable for Roth X-PERT S5® pipe 16 to 20 mm providing the underfloor designer with a choice of centres and patterns to achieve optimum heating or cooling across the floor.

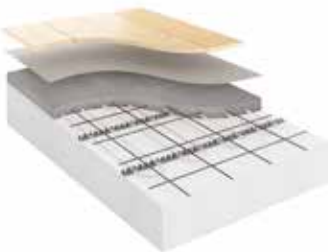

Roth Pin Clamp System

Based on the tacker clip function the compression spring gun delivers a staple pin securing 10.5 – 16 mm pipe into wooden floors. The tool holds 4 x 20 pin magazines. The clip is designed with 16 mm steel pins completed with a solid plastic collar giving a finishing height of 20 mm.

Roth Knob System

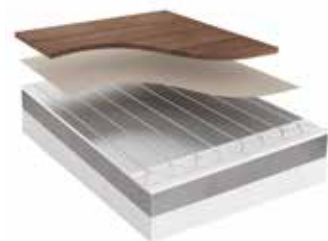

The Roth Knob System is characterized by its easy lay installation. The undercut ears of the castellated knob contour enable Roth X-PERT® S5 pipe 14 to 16 mm to be fixed into position without any need for tools. All installation centres and patterns are possible within the 50 mm knob grid. In addition to the basic castellated sheet the system is available with two EPS insulation options 10 and 30 mm.

Roth Clip Rail System

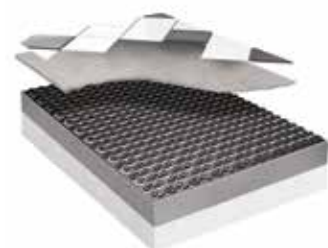

The Roth Clip Rail System is attached to existing insulation with holding clips or secured in concrete with nail a gun, in addition the rail comes with adhesive tape on the underside to secure initial positioning. The clip rail is 2 meters long with options for mounting 10.5 mm, 16 mm or 20 mm Roth X-PERT® S5 Pipe. The 50 mm rail clip spacing provides pipe centre flexibility, fixing is achieved by simply pressing the pipe into the rail clip. Distance between clip rail rows should be designed at 1 m intervals.

ROTH LOW PROFILE SYSTEMS

Roth QuickTemp Compact® System

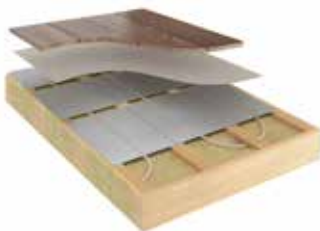

Roth QuickTemp Compact® is a specially developed dry system for the installation of underfloor heating where low overall installation height and quick heat response time is required. The system uses 10.5 mm Roth X-PERT® S5 Pipe laid in a 4 track, 150 centres 0.5 mm aluminium distribution plate bonded to high density EPS insulation to give total 14 mm height build up. Roth QuickTemp Compact® can be installed as a floating system for wood flooring or as a fixed system for tiles using Roth QuickTemp Compact® FLEX FIX adhesive. The system also has the option of a 24 mm bonded insulation plated for installation with 16 mm Roth X-PERT® S5 Pipe.

Roth QuickTemp ClimaComfort®

Roth QuickTemp ClimaComfort® is a versatile, easy to install low profile screed system that supports all types of flooring. Based on a design height of 17 mm the system is especially suitable for renovations projects. The specially developed honeycomb castellation allows the Roth QuickTemp ClimaComfort® FLOW, a self-leveling fibre screed to create a solid thermal mass around the 10.5 mm pipe. The result produces the system with both structural strength and rapid thermal response times. The castellated design gives total design and pattern flexibility to deliver optimum heat output to the most challenging of project.

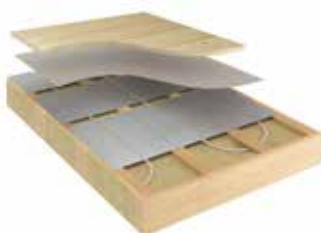

ROTH JOISTED/DRY CONSTRUCTION SYSTEMS

SYSTEM DESCRIPTION

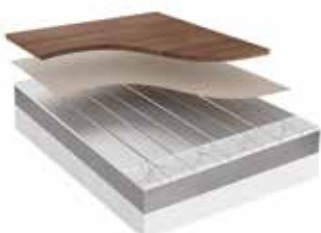

Roth QuickTemp Heat diffusion Plate

Roth QuickTemp heat distribution plates are designed to be installed directly on the top of the suspended timber floor joists or on top of floor battens. The aluminium plates lay flush across the joists or battens with minimum height build up creating 100% contact surface with floor covering resulting in even heat distribution. The Roth system uses 16 mm PERT S5® pipe in 2 x track 200 mm centres with 1000 mm x 390 mm x 0.5 mm plates.

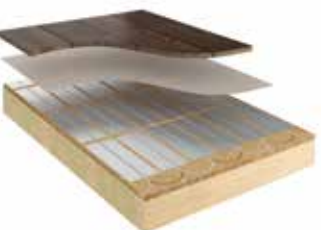

Roth QuickTemp Heat diffusion Plate with EPS Insulation

Roth QuickTemp heat distribution plates with 30 mm EPS insulation are designed to be installed with the aluminium plates directly on the top of the suspended timber floor joists. The insulation panel is positioned between the joists fixed onto wooden battens. The aluminum plates lay flush across the joists or battens with minimum height built up creating 100% contact surface with floor covering resulting in even heat distribution. The Roth system uses 16 mm PERT S5® pipe in 2 x track 200 mm centres.

Roth QuickTemp Routed EPS Universal System

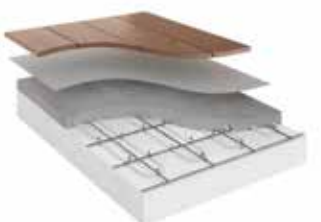

Roth QuickTemp Universal EPS 30 mm panel can be used for all types of constructions. The panel can be laid on stable substrate of concrete, wood, etc., but also on other insulation. The panel is designed to be installed with Roth X-PERT S5® 16 mm and 20 mm pipes which are laid in independent single-track Roth aluminium heat distribution plates. On the same panel there is the option of 3 x 16 mm at 150 mm centres pipe tracks or 2 x 200 mm centre per 1800 x 600 mm plate to meet required w/m² heat output figure.

Roth QuickTemp Routed Chipboard System

Roth QuickTemp universal chipboard system is an ideal solution for new construction and renovation projects replacing traditional chipboard/floorboard areas. The system consists of a 22 mm routed board which is then laid in the same way as normal construction chipboard. The board is designed to be installed with Roth X-PERT S5® 16 mm pipe which sits in Roth aluminium heat distribution plates. There are 3 single track (1200 mm) plate options 0.3 mm – 0.7 mm at 150 or 200 mm centres to ensure the heat distribution delivers the designed output performance for the building infrastructure.

ROTH COMMERCIAL SYSTEMS

Roth commercial Systems

When it comes to large-scale applications and buildings with special load-bearing capacity requirements, Roth's underfloor design tool offers a perfect solution for different industrial and commercial applications in varying structural conditions. The Roth commercial offering utilizes 20 mm and 26 mm pipe, tied to the reinforcing bars of the concrete, combined with Roth composite manifolds. The system provides maximum design flexibility and easy installation to guarantee an energy efficient floor heating and/or cooling environment.

Roth Touchline® BL 24V (Wired)

	MATERIAL	PCK QUANTITY	UK NO.
	Roth Touchline® BL 24V control unit 6 ch Max. 6 Thermostats/Max. 12 Actuators	1 pcs	7466394006
	Roth Touchline® BL 24V control unit 12 ch Max. 12 Thermostats/Max. 18 Actuators	1 pcs	7466394012
	Roth Touchline® BL wired thermostat with display, white	1/20 pcs	7466394120
	Roth Touchline® BL wired thermostat with display, black	1/20 pcs	7466394121
	Roth Touchline® BL wired room thermostat standard	1 pcs	7466394100
	Roth Touchline® BL wired room thermostat multi 24V dial Can be used with air or floor sensor.	1 pcs	7466394140
	Roth Touchline® actuator 24V N/C	1 pcs	7466275425
	Roth Touchline® BL 24V tamper-proof cover	1 pcs	7466394910

Control Grab and Go boxes (Master)

Roth Touchline® SL box for 2 room, Master
Contains: 1 x Roth Touchline® SL controller,
2 x room thermostat, 2 x actuator (230V).

1 pcs

7466397702

Roth Touchline® SL box for 3 room, Master
Contains: 1 x Roth Touchline® SL controller,
3 x room thermostat, 3 x actuator (230V)

1 pcs

7466397703

Roth Touchline® SL box for 4 room, Master
Contains: 1 x Roth Touchline® SL controller,
4 x room thermostat, 4 x actuator (230V).

1 pcs

7466397704

Roth Touchline® SL box for 5 room, Master
Contains: 1 x Roth Touchline® SL controller,
5 x room thermostat, 5 x actuator (230V).

1 pcs

7466397705

Roth Touchline® SL box for 6 room, Master
Contains: 1 x Roth Touchline® SL controller,
6 x room thermostat, 6 x actuator (230V).

1 pcs

7466397706

Roth Touchline® SL box for 7 room, Master
Contains: 1 x Roth Touchline® SL controller,
7 x room thermostat, 7 x actuator (230V).

1 pcs

7466397707

Roth Touchline® SL box for 8 room, Master
Contains: 1 x Roth Touchline® SL controller,
8 x room thermostat, 8 x actuator (230V).

1 pcs

7466397708

Control Grab and Go boxes (Extension)

Roth Touchline® SL box for 2 room, extension
Contains: 1 x Roth Touchline® SL controller,
2 x room thermostat, 2 x actuator (230V).

1 pcs

7466397732

Roth Touchline® SL box for 3 room, extension
Contains: 1 x Roth Touchline® SL controller,
3 x room thermostat, 3 x actuator (230V)

1 pcs

7466397733

Roth Touchline® SL box for 4 room, extension
Contains: 1 x Roth Touchline® SL controller,
4 x room thermostat, 4 x actuator (230V).

1 pcs

7466397734

Roth Touchline® SL box for 5 room, extension
Contains: 1 x Roth Touchline® SL controller,
5 x room thermostat, 5 x actuator (230V).

1 pcs

7466397735

Roth Touchline® SL box for 6 room, extension
Contains: 1 x Roth Touchline® SL controller,
6 x room thermostat, 6 x actuator (230V).

1 pcs

7466397736

Roth Touchline® SL box for 7 room, extension
Contains: 1 x Roth Touchline® SL controller,
7 x room thermostat, 7 x actuator (230V).

1 pcs

7466397737

Roth Touchline® SL box for 8 room, extension
Contains: 1 x Roth Touchline® SL controller,
8 x room thermostat, 8 x actuator (230V).

1 pcs

7466397738
