

# SENTINEL A70 PRO

## Industrial Flip-Up Welding Helmet

*Sentinel A70 PRO*

### Processes

- Oxy Fuel Cutting
- Plasma Cutting
- Grinding
- Welding, GMAW (MIG/MAG)
- Welding, GTAW (TIG)
- Welding, PAW -Plasma Arc Welding
- Welding, SMAW/MMA (Stick)

### For welders who don't back down.

The Sentinel A70 PRO is built for the realities of heavy industry, long shifts, harsh conditions, and nonstop sparks. A wide-open view and precise digital control put you in command, while the flip-up design and oversized grinding shield keep you working without missing a beat.

When the light's low, the integrated work light cuts through the dark, and rugged protection shields your head and neck where it matters most. Powered for endurance and connected for control, it's a helmet built to match your pace, tough, reliable, and ready for the grind.

Because in heavy industry, your gear must work as hard as you do.

- Large 123 x 75 mm (4.8 x 3 in.) ADF view area with 3/5-13 adjustable shade range in 0.5 shade increments
- 10-step delay and sensitivity adjustment
- Fully-digital user interface with internal and external control options
- Flip-ADF bracket is removable for extended finishing operations
- Huge, 150 x 194 mm ( 5.9 x 7.625 in.) grinding face shield
- 50-lumen LED work light to aid in work setup and inspection when ambient light is poor
- Compatible with ESAB's Helmet Connect app via Bluetooth connection
- Rechargeable Lithium battery
- Additional head and neck accessories reduce welder's contact with sparks
